

## #1 integration platform for connecting on-premise and cloud applications

With 150,000+ developers worldwide and 3500 companies in production, Mule ESB™ is the world's most widely used integration platform.

- ✓ Connect anything to anything
- ✓ Create foundation for SOA
- ✓ Modernize legacy systems
- ✓ Eliminate point-to-point integration

### Easy to learn, powerful to use

- Pre-built connectivity to over 120 applications
- Uses familiar tools like Eclipse, Maven and Spring
- Graphical IDE makes every developer an integration developer

### Lower risk, superior ROI

- 96% customer satisfaction
- Open-source core means no vendor lock-in
- Lightweight and high performance, even on developer laptops

### Enterprise-class with all the “ilities” built in

- Zero message loss reliability
- Complete visibility and control over events and performance
- Proactive threat management keeps data secure

“ Mule ESB represents the ideal combination of lightweight, standards based, and robust technology with the enterprise-class stability and support that we need to stay up and running 100% of the time.”

- Jason Whiting, Senior IT Operations Manager, TiVo

“ With Mule ESB handling integration, engineers can now focus on the business, integrity and quality aspects of the system.”

- Jeremy Peet, Technical Director, Open Answers

Leading organizations trust MuleSoft for mission critical applications

MuleSoft provides the most widely used integration platform to connect any application, data service or API, across the cloud and on-premise continuum. As SaaS, mobile and Big Data converge, enterprises face a choice: become overwhelmed by the resulting explosion of endpoints or seize the opportunity to gain competitive advantage. Companies can no longer compete with just the assets, technology and talent within their four walls. In the era of the New Enterprise, companies must combine an explosion of applications, data, partners and customers into a single, high performing entity. Founded on the idea that connecting applications should not be hard, MuleSoft helps organizations harness the power of their applications through integration. Delivered as a packaged integration experience that eliminates costly point-to-point code, MuleSoft's Anypoint Platform combines Mule ESB, CloudHub and Anypoint Connectors with capabilities for API creation, publishing and management. Supporting billions of transactions per day, MuleSoft is used in production by global leaders in major industry verticals, including Walmart, MasterCard, Nokia, Nestlé and Honeywell, and powers integrations with leading SaaS vendors such as salesforce.com, NetSuite, Workday, Intuit and Box.
